DETAILED ACTION

Election/Restrictions

Claims 1-3, and 5 are directed to an allowable product. Pursuant to the procedures set forth in the Official Gazette notice dated March 26, 1996 (1184 O.G. 86), claim 6, directed to the process of making or using the patentable product, previously withdrawn from consideration as a result of a restriction requirement, is now subject to being rejoined. Claim 6 is hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Since all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, the restriction requirement made in Paper No. 9 is hereby withdrawn.

Allowable Subject Matter

Claims 1-3, and 5-6 are allowed.

The following is an examiner's statement of reasons for allowance: in an armature of a rotary electric machine and its method of manufacture, comprising:

a rotary shaft;

an armature core composed of a plurality of laminated sheets through which the shaft is inserted and a plurality of slots and projections at the outer periphery thereof;

an armature coil composed of a plurality of conductor segments having in-slot portions being respectively inserted into the slots; and

a commutator formed by a portion of the armature coil to be integrated with the armature coil at an end thereof;

the prior art's references of record do not disclose that the armature core comprises a belt-like pressed anchoring portion disposed at a portion of the laminated sheets near the commutator for pressing a part of each of the in-slot portions that correspond to the portion of the laminated sheets to the armature core more strongly than other parts of the in-slot portions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
